AS DEATHS MOUNT, STILL NO CEASEFIRE

PALESTINE'S MARTYRS

THE LIST GROWS LONGER

In our first issue, we named 2,611 of the over 12,000 murdered by Israeli occupation forces in their assault on Gaza. A week later, with no ceasefire, we continue to name those killed in the genocide.

These are the names of only 2,260 of the over 12,000 dead . . .

On October 25, after Joe Biden said that he had "no notion if Palestinians are telling the truth about how many people are killed," the Gaza Health Ministry released the names of 6,747 dead. Since then, the number has risen to over 12,000, but no comprehensive list is yet available. Since November 11 the Health Ministry has not been able to update its death tolls due to loss of communications with hospitals under bombardment from the Israeli invasion.

“We did not protect them.”

Israeli occupation forces are killing our colleagues: more than half of the reporters working in Gaza have been killed as of November 13, 2023. The United States and the *New York Times* are complicit in their deaths.

By manufacturing consent for the genocide underway in Gaza, media outlets like the *New York Times* endanger journalists and limit truthful reporting. It is the moral and professional duty of the Committee to Protect Journalists not only to document the repression of journalists—including their murder—but also to hold our partners like the *New York Time*s to account for their complicity in such lethal repression.

These are their names:
